FYI_1: Market Conditions and VIX direction generally determines the overall accuracy for Call and Put Forecasts.

FYI_2: Buying a diverse portfolio of forecasted options contracts at bargain prices is a winning investment strategy.

FYI_3: The 6day Chaikin Money Flow suggests an options forecast lockon for || [no-days] || or (| [1-day] |) or (([2-days])) in a row.

FYI_4: [ø => Vetoed Puts , \ => Vetoed Calls]

FYI_ITM: (Strike, $price, P1|P2%) = odds the strike closes in the money on some session by the 1st | 2nd Friday, bootstrapped from the ticker's last 60 sessions. mNN = the market's odds for the same 1st-Friday event, implied by the option's own price — bigger P1 than mNN = the option looks cheap. Lines are ordered and colored by their best P2.
